Feature/Package	Package /Option								
	Pipe Winder	Lite	Lite+	Axsym	Spars	Spheres	Plates	Elbow	Pipe T
Hoop winding on cylinders (pipes)	√	√	√	√					
Multi-stage Hoop winding on pipes	√	√	√	√					
Helical (geodesic) winding on Pipes	√	√	√	√					
Geodesics winding on pipes with dome ends		√	√	√					
Unequal end openings (non-geodesic) on pipes with dome ends			√	√					
Joining paths - Parametric, on pipes only	√	√	√	√					
Joining paths - Parametric, on pipe and dome ends			√	√		√			
Joining paths - fully user controlled				√					
Post-processing 2 Axes Only	√								
Post-processing 2-5 axes		√	√	√	√		√	√	√
Post-processing 6 axes		0	0	√	√			√	√
Post-processing 6 axes industrial robot		0	0	0	0	0		0	0
General axisymmetric mandrel editor				√					
General geodesic and non-geodesic winding of ALL axisymmetric shapes				√					
Mandrel profile from DXF file				√					
Geodesic winding of Non-round constant sections from DXF data (Spars)				0	√				
Full graphical 3D visualisation/simulation		√	√	√	√	√	√	√	√
Windows User interface, Compatible with Window 2000/XP/Vista		√	√	√	√	√	√	√	√
Fully parametric multi-layer ultra high pressure spheres (uniform wall thickness)						√			
Wall Thickness calculation output				√		√			
Flat plate with interwoven lay-up for test specimens (Plates)		0	0	0			√		
Parametric winding for pipe bends (Pipe Elbow)		0	0	0				√	
Pipe T joints (Pipe T)									√
Patran Neutral file FEA interface		0	0	0	0			0	
User help file	√	√	√	√	√	√	√	√	√
12 month off-site technical support and updates	√	√	√	√	√	√	√	√	√
